

Sompalli Jayadeep Naidu

Aspiring Software Engineer | MERN Stack Developer | Data Structures & Algorithms

sompallijayadeep8@gmail.com | [linkedin.com/in/jayadeep-sompalli-b127923b2](https://www.linkedin.com/in/jayadeep-sompalli-b127923b2) | github.com/sompallijayadeep8-ui | [DSA-IN-CPP](#)

PROFESSIONAL SUMMARY

Computer Science and Business Systems undergraduate passionate about Full Stack Development and Data Structures & Algorithms. Experienced in building and deploying MERN stack applications with secure authentication, REST APIs, and cloud deployment using Vercel, Render, and MongoDB Atlas. Currently strengthening problem-solving skills through DSA while building real-world software projects and seeking Software Engineering Internship opportunities.

EDUCATION

Nitte Meenakshi Institute of Technology (NMIT)

B.Tech · Computer Science and Business Systems | Bangalore, India

Aug 2025 – May 2029 (Expected)

TECHNICAL SKILLS

Languages	C++, JavaScript (ES6+), HTML5, CSS3
Frontend	React.js, React Router, Axios, Responsive Design
Backend	Node.js, Express.js, REST APIs, JWT, bcrypt
Database	MongoDB, Mongoose, MongoDB Atlas
Tools	Git, GitHub, VS Code, Postman, Vercel, Render
Concepts	Data Structures & Algorithms, CRUD Operations, Auth Flows, Basic System Design

PROJECTS

SpendWise — Personal Finance Tracker

Live Demo: <https://spendwise-olive-rho.vercel.app> · GitHub: <https://github.com/sompallijayadeep8-ui/spendwise>

React.js · Node.js · Express.js · MongoDB Atlas · JWT · bcrypt · Deployed: Vercel & Render

- Built and deployed a full-stack MERN personal finance tracker using React, Node.js, Express.js, and MongoDB Atlas with secure JWT authentication and bcrypt password hashing.
- Built RESTful API (Node.js/Express) supporting full CRUD on transactions with server-side search, filter, and monthly budget tracking logic
- Engineered an analytics dashboard with real-time income/expense summaries and Chart.js pie chart visualizations for spending pattern insights
- Implemented CSV export and a fully responsive UI; deployed frontend on Vercel and backend on Render, delivering a production-ready application

Placement Tracker — Student Application Manager

Live Demo: <https://lnkd.in/gtcy3Gk9> · GitHub: <https://github.com/sompallijayadeep8-ui/placement-tracker>

JavaScript (ES6+) · HTML5 · CSS3 · Chart.js · LocalStorage API

- Developed a zero-backend client-side SPA to track internship/placement applications with persistent LocalStorage state management
- Implemented multi-criteria search, filter, and sort with a Chart.js status-distribution dashboard surfacing real-time application statistics
- Delivered full CRUD workflows and a responsive, clean UI — enabling students to manage their entire job search without spreadsheet overhead

DATA STRUCTURES & ALGORITHMS

Active problem-solving practice in C++ · Repository: <https://github.com/sompallijayadeep8-ui/DSA-IN-CPP>

- Topics: Arrays, Strings, Hashing, Binary Search, Two Pointers, Sliding Window, Prefix Sum, Recursion, Sorting & Searching
- Proficient with C++ STL — vector, map, set, unordered_map — applied to algorithmic and mathematics-based problem patterns

CURRENT LEARNING

► Advanced MERN Development · ► Data Structures & Algorithms · ► System Design
